iHome 4 Smart Peephole Viewer Video Doorbell

Version 1.4 August 2016

SECURITY CAUTION

- Use standard rechargeable battery only. Using other type of battery may cause damage.
- Handle with care to prevent damage caused by dropping.
- To prevent hardware damage, do not press hard on the indoor LCD lens, outdoor camera lens or outdoor PIR sensor (black ball shape). In case of LCD or broken lens avoid eye contact with crystal liquid.
- Do not put the product in place with high temperature/humidity/strong dust/salty fog/rain to prevent product damage.
- Micro SD card and SIM card should be inserted before the device is powered on. The card will not be recognized if the device is powered on firstly.
- Handle indoor monitor installation with care. Pulling hard on the FPC cable may cause damage and will not be covered by warranty.
- The pictures in this manual are for reference only. Detailed information please refer to the final product.
- The information contained in this manual is subject to change without notice.

SPECIFICATIONS

- Operating system: Android 4.4.2
- CPU: Dual core 1.2GHz ARM v7
- Wi-Fi: 2.4GHz IEEE 802.11b/g/n
- App: Android & iOS App
- Peephole diameter: 15mm $\,\sim\,$ 58mm
- Peephole length: 35mm $\,\sim\,$ 120mm
- Build-in battery: 12000mAh lithium-ion
- Working voltage: 4.2V

TROUBLESHOOTING

- Charge up the device if indoor monitor restarts frequently, it may be caused by a low power.
- Power off the device and re-insert the micro SD card, or insert another micro SD card if a "Please insert Micro SD Card" or "Parameter error" indication appears after SD card is installed.
- Indication of "**Device is not ready**" when pressing "**Outdoor**" button may be caused by an unconnected FPC cable with indoor monitor. Try to reconnect it.

PACKAGE LIST

FAST INSTALLATION

INSTALLATION

Installation Preparation

- Remove the old peephole viewer and check if the peephole diameter is 15mm.
- First time peephole viewer installation requires a 16mm diameter tapper to open a hole.

1) SIM & SD card installation

2) Installation Complete

Door Panel Installation

Choose appropriate screw length based on door thickness. Then twist it into the screw hole.

Feed the FPC cable through the rectangular hole. (**Note**: *The slim rectangle cut-out-section metal plate should be pointing to the right, with the largest bare-metal-section of the plate on the left side of the peephole*).

Move the steel sheet evenly towards the bolt.

Press the steel sheet against the door, and move evenly from right to left.

Tighten the screws to fasten the steel bracket. Ensure the outdoor viewer is squared up/level before tightening the screws.

Connect the FPC cable to the indoor monitor.

Secure the indoor monitor to the doorplate by sliding it from the top downward.

SOFTWARE

Picture

- System will create new file to save Visitor Picture according to picture time stamp.
- Press "Picture" icon, select target file to view, delete or sort.

- 1. Login App bind the device
- 2. Click to the "Bind/Unbind doorbells" then click 💷 on
- 3. Click scan to connect with device
- 4. Scan the QR code from device to get device ID number
- 5. Please input device name and click "OK" to bind device

Step 4. Bind iHome4 device to Rollup App

Device Before binding Rollup App with iHome4 device, please keep iHome4 under User binding window.

Please note : User binding window—under this page, you could start binding the device on your smart phone. This page only could last 40 seconds, once the time is not enough for binding, please re-enter this page before binding.

Part 2. App live Video Feed by Two Ways

iHome4 will send alerts(live video feed) under two situation, 1)when somebody press the ring button, 2)Under PIR motion mode, auto alerts will be sent when somebody stay front of your door without pressing ring button.

1) App live video feed by pressing the doorbell

Video talk

Connect device

Notes: When you are having video talk with door visitors, you could press the smart phone screen and click Start record to record door visitors' talk with you, and the video record will be stored in the smart phone SD card (there is a file name "DCIM \rightarrow Camera" in your smart phone).

Rollup App will be updated continuously, and the new version will be noted to your smart phone.

2) App live video feed by PIR motion alarm

Video talk

Connect device

Tips: Set PIR motion on iHome4 device

Auto Alarm Time

Monitor settings

Auto Alarm Time: There are 5 sec, 10 sec, 20 sec, 40 sec and 1min as choice. When you set 40 sec, iHome4 will send you alerts when somebody stay front of your door more than 40 sec without pressing your ring button.

Monitor settings: if you does not insert SIM card for iHome4, there are two choice for monitor settings, Push means iHome4 device need send you motion alarm alerts. As to Ring, if you click to choose it, the iHome4 device not only sent PIR motion alerts, but also will generate sound alarm, ring, ring, ring... (You could also do monitor settings on smart phone by remote, which please refer to part three).

Part 3. Set parameter for iHome4 App on smart phone

Parameter setting allows you to operate iHome4 device by remote on your smart phone for convenience purpose.

There are four remote settings available: Doorbell setting, Smart monitor and Sensor setting. We mainly explain Doorbell setting, Smart monitor and Sensor setting.

Smart monitor(as picture): you could make motion alarm works by choose Open, or close this function by close it on your smart phone.

Sensor setting: you could operate sensor setting to decide the work way of motion alarm. By Push, iHome4 device will send you motion alarm alerts when somebody stay front of your door without pressing the ring button. By Rings, the device also generate sound alarm ring ring for surveillance purpose while sending you motion alarm alerts.
